Preface

1 Purpose of this document

The purpose of this document is to provide basic functional overview descriptions and relevant examples for a better understanding of the functions.

2 Intended Audience

This document is aimed at those who implement this function.

3 Associated Documents

This document has to be combined to its corresponding Technical Reference Guide and possibly to Product specifications.

4 Structure of this document

This document is composed of the following parts:

- the functional description: overview, supported operations, limitations, unsupported operations, prerequisites and possibly reference to product specifications
- the detailed description to build the query and to retrieve data from the reply
- a set of relevant examples

Profile_UpdateProfile

This service allows the update of traveler agency profiles.

Function: Profile_UpdateProfile.

1 Overview

The update of a profile is done via AMA_UpdateRQ request.

An AMA_UpdateRQ message is sent to Amadeus Customer Server.

- The unique identifier for the profile is sent to the system to update the profile in the database.
- The version number of the profile to be updated. The version number is mandatory in an update request. The profile update is processed only if the version numbers match between the update request and the profile stored in the Customer server database.
- The office ID

This version number is available in the AMA_ProfileCreateRS, the AMA_ProfileReadRS or the AMA_UpdateRS messages, in the attribute Instance of the UniqueID node.

```
<UniqueID Type="21" Instance="3" ID="ABC123" ID_Context="CSX"/>
```

An AMA_UpdateRS message is received to acknowledge the request's success.

If the profile update is correctly processed, the system returns a confirmation message which contains the Amadeus record locator of the updated profile as well as the new profile version number .

1.1 Supported Operations

This service supports the profile update for a travel agency profile in Amadeus Customer Database.

1.2 Limitations

Not applicable

1.3 Unsupported Operations

Only full profile updates are supported. Any profile data not sent in an update request but present in the Customer server database is deleted.

1.4 Prerequisites

There are no specific prerequisites to start using this service.

2 Building A Query

As explained in the previous section, only full profile updates are supported. Any profile data not sent in an update request but present in the Customer server database is deleted. In other words, when updating a profile all the profile elements should be included in the request. Otherwise, the data will be lost.

3 Receiving A Reply

The message AMA_UpdateRS contains the update status on Amadeus Customer Server.

If the profile has been correctly updated from the Amadeus Customer Server, then the response contains the Amadeus record locator. If the update succeeds, the version number is incremented by 1.

If an error occurs during the processing, an error code and the corresponding error message are returned. As soon as an error is raised by the Customer server during the update process, the profile is not updated, whatever the error type.

4 Error Messages

If an error occurs, the response message contains an error code and an error message. The table below summarizes the contexts where an error is returned by the Customer server.

Code	Message	Description
Security		
11143	SECURITY MATRIX NOT FOUND CONTACT HELP DESK	The requestor is not authorized to update the profile. No security matrix was provided. (airline profiles only)
00020	RESTRICTED	The requestor is not authorized to update the profile.
11609	ADD ELEMENT NOT ALLOWED	The creation of a specific profile attribute is not allowed
02733	DELETION OF ELEMENT NOT ALLOWED	The deletion of a specific profile attribute is not allowed
06264	MODIFICATION NOT ALLOWED	The modification of a specific profile attribute is not allowed
00270	ACCESS RESTRICTED	A profile data in read-only was requested to be added/ updated in the profile (airline profiles only).
Profile features		
09255	RECORD LOCATOR NOT FOUND	The updated profile is not found in CSX database.
01319	SIMULTANEOUS CHANGES	Update request with the wrong version number.
Occurrences/ format		
03357	MANDATORY ITEMS	Some mandatory items are missing in the request.
07869	MISSING MANDATORY FIELD	Missing mandatory attributes for a given profile element
02762	INVALID DATA/FORMAT	Invalid format or unexpected values for some attributes.
12242	MIN NUMBER OF OCCURRENCES HAS NOT BEEN REACHED	Missing mandatory element in profile (airline profiles only)
11620	MAX NUMBER OF OCCURRENCES IS REACHED	Too many occurrences of an element in profile (airline profiles only)
884	INVALID COUNTRY CODE	Invalid country code in profile attribute, when applicable (address, country, country of birth, citizenship, etc.)

Unique identifiers		
09249	DUPLICATE INDEX	The index already exists in the office family
Home airport code (PAD)		
10421	INVALID AIRPORT/CITY CODE	Invalid ISO code for the airport default (PAD element)
Booking office (airline profiles only)		
24248	BOOKING OFFICE NOT AUTHORIZED	Try to delete the booking office (PBO element) of a profile owned by an office synchronized with AGM or to update it with an office belonging to another market.
Associations between profiles		
11921	SPOUSE ASSOCIATION ALREADY EXISTS	Several frequent flyer profile associations with another frequent flyer profile are not allowed.
11922	ASSOCIATED SPOUSE NOT PRESENT	The frequent flyer specified for the association with another frequent flyer does not exist in CSX database.
11618	SPOUSE ASSOCIATION NOT ALLOWED	The frequent flyer specified for the association with another frequent flyer belongs to another airline.
Other		
23116	BACK OFFICE SYNCHRONIZATION PROBLEM	The profile update is rejected by CSX because of a problem in the CSX-AGM synchronization.
00011	UNABLE TO PROCESS	The request cannot be processed by CSX.

4.1 Error Reply

```
<AMA_UpdateRS xmlns="http://xml.amadeus.com/2008/10/AMA/Profile" Version="12.2" >
  <Errors>
    <Error Code="2.HGC" ShortText="INVALID DATA" Type="21" >Invalid country code XX</Error>
```

```
</Errors>  
</AMA_UpdateRS>
```

5 Operations

5.1 Operation: Update a profile

Here is an example of AMA_UpdateRQ message:

5.1.1 Query Structure

```
<AMA_UpdateRQ xmlns="http://xml.amadeus.com/2008/10/AMA/Profile" Version="12.2" >
  <UniqueID Type="21" ID="100005" ID_Context="CSX" Instance="1" />
  <Position XPath="/" >
    <Root Operation="replace" >
      <UniqueID Type="9" ID="ABC6F0020" ID_Context="CSX" />
      <Profile ProfileType="1" Status="A" >
        <Customer>
          <PersonName>
            <GivenName>Sian</GivenName>
            <Surname>Thomas</Surname>
          </PersonName>
          <Telephone PhoneLocationType="7" PhoneTechType="1" PhoneNumber="+33 1
04-97-15-45-25" />
          <Address Description="Primary" FormattedInd="true" DefaultInd="true" UseType="1" >
            <AddressLine>Stringline 1</AddressLine>
            <AddressLine>Stringline 2</AddressLine>
            <CityName>Nice</CityName>
            <PostalCode>06000</PostalCode>
            <CountryName Code="FR" />
          </Address>
        </Customer>
        <PrefCollections>
          <PrefCollection>
            <AirlinePref>
              <AirportOriginPref LocationCode="CDG" />
            </AirlinePref>
          </PrefCollection>
        </PrefCollections>
      </Profile>
    </Root>
  </Position>
</AMA_UpdateRQ>
```

5.1.2 Reply Structure

```
<AMA_UpdateRS xmlns="http://xml.amadeus.com/2008/10/AMA/Profile" Version="12.2" >
  <Success/>
```

```
<UniqueID Type="21" Instance="2" ID="100005" ID_Context="CSX" />  
</AMA_UpdateRS>
```

5.1.3 Possible Errors

See "Error Messages" section.
